

DuraVision Newsletter July - August 2014

Kia ora and welcome to our latest Newsletter

Well I have survived my first couple of months and now I have made it to newsletter number two in the Newsletter division of my job title. I guess my first newsletter must have been ok or Alastair would have given the job to someone else. As promised I said I would share a photo of Gordon's last day lunch at the pub. As to no surprise, with me only knowing Gordon for about a month, there was a fair amount of beer drinking happening on his last day. You can tell who had to go back to work and who didn't. Check out the photo. I have enjoyed my first couple of months trying to understand what everyone is talking about. I think I am getting there. I find it very interesting as I drive around this beautiful country getting out and visiting our customers that I am always looking for Convex mirrors in driveways and anywhere it is difficult to see what traffic is coming. Who would have thought. Thank you for all the congratulatory emails and positive information about Alastair and the team here at Duravision after my first newsletter.

WELCOME TO DURAVISION - BANGLADESH

It is great to announce that we have a new distributor out of Bangladesh come on board in our International sector. Asahi Japan Auto Solution is a sister concern of Daiei International. Asahi Japan Auto Solutions started its operation in 2010. AJAS has been offering maintenance and servicing automobiles in Dhaka. Part of their special services, are Duravision Safety Mirrors for both indoor and outdoor. We have a little bit of tweaking to do on their website but we will get there. We are delighted to have Asahi Auto come on board and we look forward to having great success within the Convex Mirror safety range with them.

INTERNATIONAL SALES

It is great to see the orders coming in from our International customers, and the amount of quotes that we are sending through that are being accepted. Let's not stop there. Keep them coming in and keep up the great work out there.

FEATURE PRODUCT

Our feature product for this month is our **Indoor Standard Range** of convex mirrors. For the best range of convex mirrors to deter Retail Theft and Accident Prevention, these are our most popular and versatile mirrors on the market.

NEW ZEALAND REPS

"GO NZ GO, GO NZ GO" Jill and myself represented New Zealand in the Veterans Hockey Team at the Oceania Inline Roller Hockey Championships last weekend. We beat the Aussies in a five game series, 4 games to 1.

FIFA WORLD CUP

Congratulations to Germany for their win in the finals of the Football World Cup in Brazil! I hope that you have all enjoyed the competition this year. With NZ or Canada not being involved we are all interested in seeing how our customers Countries have played. We have enjoyed checking the results every morning and are always amused by how Google is displaying their home page. I'm sure there have been some late nights or early mornings for you all while watching your teams play to their best.

If you are on holiday in the Northern Hemisphere have a great summer. If you are in the Southern Hemisphere, stay warm and dry.

Regards
Duane

OH... AND GERMANY TOO!

FIFA World Cup Champions 2014

Featured Product:

DETER retail theft before it happens. DuraVision Indoor Standard convex mirrors are a cost effective and powerful deterrent to retail theft. These mirrors eliminate blind spots to allow staff and security to constantly and inconspicuously monitor customers. With an estimated annual shrinkage of 1-2% of retail sales financial losses from retail theft are huge. Research has shown that retailers seem to utilize their own resources for store security than security firms. This information alone makes DuraVision Indoor/Outdoor mirrors even more valuable that every retail store should have in their shops.

Accident prevention is the key. If you want to avoid collisions in the workplace safety mirrors are paramount. DuraVision Indoor Standard mirrors can significantly reduce the risk of human injury and stock damage when positioned correctly in warehouses, hospitals and garages. They are also a good tool for quality control in factories, enabling the worker direct observation and to keep their distance from machinery in dangerous situations.

DuraVision™ Indoor Standard mirrors are very versatile and will adjust to any angle to allow optimal line of sight. This Acrylic mirror can be positioned to see around corners, aisles and partitions, in corridors and hallways or to view machinery. Ideal for store security, in warehouses, hospitals, play centres or any other situation where blind spots are present.
